Sales Slide: How We Sell, Price & Scale Purchasing Velocity

A multi-sided monetization engine driving low-friction checkout across consumers, merchants, and enterprise brands.

1. HOW WE SELL & SALES CHANNELS

- **Direct Ground Sales:** Field cluster scouts onboard 25–30 Kiranas per commercial corridor in 48 hours with turnkey QR kits.
- **Indirect Counter Flywheel:** In-store counter standees turn every merchant cashier into a consumer sales rep.
- **B2B Enterprise Sales:** Direct outreach to FMCG brand managers offering real-time offline SKU intelligence dashboards.
- **Digital In-App Funnel:** Organic app onboarding powered by receipt-sharing viral loops and localized deals.

2. WHAT WE CHARGE & WHO PAYS

- **Merchant Micro-Take (1.5%–2.5%):** Paid by local Kiranas on incremental footfall GMV—less than 1/10th of aggregator commissions.
- **SpendIt VIP (₹199/mo or ₹1,999/yr):** Paid by middle-class power shoppers to unlock 2.5× higher monthly reward caps and Vault access.
- **Brand Co-Sponsorship & Data:** FMCG conglomerates fund targeted SKU promotions out of their multi-crore offline trade budgets.
- **Zero Equity Cash Burn:** All discounts are funded by merchants and FMCG brands, not company equity.

3. PURCHASING PROCESS & COMPENSATION

- **Consumer Purchase Flow:** Scan paper bill → Instant credit accrual → 1-click dynamic discount QR redemption at checkout.
- **Merchant Purchasing:** Zero POS terminal hardware cost. Onboarding takes <2 minutes via mobile web and lightweight QR.
- **Sales Rep Scoring:** Reps scored on 30-day merchant retention (>75%) and active daily invoice verification throughput.
- **Compensation Structure:** Base pay + ₹500 per activated store + 0.25% trail commission on corridor GMV.

COMPETITIVE PRICING FIT: While Blinkit/Zepto charge punitive 18%–28% aggregator fees, SpendItWisely's 1.5%–2.5% fee aligns incentives and creates impenetrable merchant loyalty.

PILOT GMV RUN-RATE: ₹14.5 CR

Marketing Slide: Attention Capture, Viral Loops & Market Sizing

Capturing India's offline spending through point-of-sale guerrilla placement and high-conversion viral hooks.

1. ATTENTION & GUERRILLA MARKETING

- **Point-of-Sale Guerrilla Hook:** High-contrast standees placed next to UPI soundboxes: *"Turn this paper bill into ₹50 cash discount."*
- **The Cashier Script:** Cashiers trained to prompt: *"Scan this bill on SpendItWisely before throwing it away."*
- **Bill Sleeve Branding:** Partnered supermarkets slip paper invoices into branded SpendIt discount sleeves.
- **No Billboard Burn:** 100% of marketing expenditure deployed at physical point of checkout where intent is peak.

2. VIRAL MECHANICS & SOCIAL LOOPS

- **Double-Sided Referral Hook:** *"Give ₹25, Get ₹25"* in SpendIt Credits unlocked when a referred friend scans their first valid bill.
- **Localized WhatsApp Communities:** Curated broadcast groups for neighborhood clusters broadcasting daily flash kirana deals.
- **Social Brag Mechanics:** Monthly savings summaries easily shareable to WhatsApp Status (*"Saved ₹1,420 on groceries this month"*).
- **Targeted Geo-Ads:** Hyperlocal Instagram reels geo-fenced strictly within 2km of active merchant clusters.

3. TAM → SAM → SOM ALLOCATION

- TOTAL ADDRESSABLE MARKET (TAM)
₹75+ Lakh Cr (\$900B+)
Total Indian retail with ₹1.5–2L Cr monthly GST collections.
- SERVICEABLE ADDRESSABLE MARKET (SAM)
₹8.5 Lakh Cr (\$102B)
GST-registered urban & semi-urban retail and supermarkets.
- SERVICEABLE OBTAINABLE MARKET (SOM - Y3)
₹340 Cr GMV
750,000 active shoppers across 15 high-density urban clusters.

Team Slide: Domain Depth Across Fintech, AI & Retail Logistics

A leadership team uniquely equipped to execute at the complex intersection of Indian tax law and offline retail.

Founder & CEO

FINTECH & STRATEGY LEAD

Parent Company: Renext Technologies Pvt Ltd

- 10+ years engineering digital payments, merchant acquisition, and transactional software systems.
- Deep expertise in Indian GST architecture, compliance guardrails, and consumer behavioral economics.
- Spearheading pilot execution across Rudrapur manufacturing clusters and Bengaluru tech hubs.

Co-Founder & CTO

HEAD OF AI & CLOUD ARCHITECTURE

Core Domain: Computer Vision & High-Throughput Rails

- Expert in multimodal OCR, perceptual image hashing, and real-time document verification pipelines.
- Architected the sub-3-second receipt parsing model with >98.5% line-item recognition accuracy.
- Built multi-factor fraud detection preventing duplicate receipt uploads and synthetic bill injection.

VP of Operations

GROUND DENSITY & MERCHANT GROWTH

Core Domain: FMCG Trade & Offline Retail

- 12+ years leading offline distribution, kirana field onboarding, and regional FMCG trade logistics.
- Architected the 48-hour corridor merchant density model maintaining 75%+ 30-day merchant retention.
- Direct ties with regional Vyapar Mandals and retail merchant federations.

KEY ADVISORS & BOARD GOVERNANCE

Backed by veteran mentors spanning Indian retail tech, ex-FMCG commercial directors, and senior GST tax consultants ensuring ironclad regulatory compliance and corporate governance.

Quarterly board audit reviews; formal adherence to Digital Personal Data Protection (DPDP) Act.

CRITICAL ROLES TO FILL WITH SEED CAPITAL

- **Lead ML Engineer (Fraud & Document Intel):** Scaling perceptual hashing and on-device OCR inference.
- **Regional Head of Merchant Operations:** Driving 500+ store cluster density across North & South hubs.
- **Head of Regulatory & Government Affairs:** Managing public GST registry API bridges and DPDP compliance.

Partner Slide: Strategic Alliances, ONDC Logistics & Brand Networks

Leveraging external infrastructure and trade promotion budgets rather than building expensive proprietary silos.

1. MERCHANT NETWORKS

Vyapar Mandals & Kirana Federations

Partnerships with regional merchant associations provide trusted corridor-level access to onboard 50+ stores per cluster in single blitzes.

ROI: 80% lower merchant CAC

2. LOGISTICS & ONDC RAIL

Shadowfax • Porter • Dunzo

ONDC-compatible delivery network integration handles on-demand boutique trials and extended orders on 100% variable pricing.

ROI: Zero fleet capex

3. FMCG BRAND SPONSORS

Enterprise Consumer Brands

FMCG brands co-sponsor receipt cashbacks on targeted SKUs to capture verified offline market share and redirect trade budgets.

ROI: 100% margin data revenue

4. MASTER ARTISANS

Regional Weaver Co-ops

Direct ties with heritage handloom hubs power the SpendIt Vault micro-batches, cutting out 4 layers of wholesale middlemen.

ROI: 35%–45% gross margins

HOW PARTNERS LEVERAGE SPENDITWISELY IP

- **SpendIt Verified Merchant Seal:** Digital trust badge that neighborhood shoppers seek out for guaranteed savings.
- **Anonymized SKU Data Feeds:** FMCG partners access granular offline basket analytics impossible to obtain via UPI rails.
- **Dynamic Reward Credit API:** Kiranas and supermarkets integrate point deduction directly into their local billing software.

COOPETITION & NETWORK SYMMETRY

We do not compete with Kiranas or delivery providers—we aggregate them. By positioning SpendItWisely as the neighborhood retailer’s defensive weapon against quick commerce monopolies, partner retention exceeds 85%.

PARTNER RETENTION GOAL: >80% 90-Day Merchant Stickiness Across Target Pilot Hubs

Financial Slide: 3-Year Projections, P&L & Cash Flow Forecast

Demonstrating positive unit contribution margins scaling from 2 pilot cities to a national 15-city footprint.

OPERATING METRIC & P&L LINE	YEAR 1 (PILOT CLUSTERS)	YEAR 2 (REGIONAL SCALE)	YEAR 3 (NATIONAL NETWORK)
Annualized Network GMV	₹14.50 Cr	₹85.00 Cr	₹340.00 Cr
Active Transacting Users	25,000	180,000	750,000
Partnered Kiranas & Boutiques	120 Stores	800 Stores	3,500 Stores
Gross Platform Revenue	₹1.10 Cr	₹8.20 Cr	₹38.50 Cr
• Merchant GMV Micro-Take (1.5%–2.5%)	₹0.29 Cr	₹1.87 Cr	₹7.48 Cr
• SpendIt VIP Consumer Subscriptions	₹0.48 Cr	₹3.60 Cr	₹16.50 Cr
• Apparel & SpendIt Vault (D2C Margins)	₹0.21 Cr	₹1.73 Cr	₹9.52 Cr
• B2B FMCG Brand Insights & Ad SaaS	₹0.12 Cr	₹1.00 Cr	₹5.00 Cr
Total Operating Expenses (OpEx)	₹2.17 Cr	₹8.45 Cr	₹25.90 Cr
EBITDA / Net Operating Profit	(₹1.07 Cr)	(₹0.25 Cr) [Breakeven]	+₹12.60 Cr (Profitable)

KEY EXPENSE DRIVERS • Tech & AI Cloud OCR (18%): Quantized models reduce per-receipt inference cost from ₹0.22 to ₹0.04. • Merchant Ground Ops (32%): Field onboarding personnel across city target clusters. • User Acquisition (28%): Point-of-sale acrylic standees and referral bonuses.	CORE OPERATING ASSUMPTIONS • Order Frequency: 12–15 repeat neighborhood transactions per active user monthly. • Average Basket Size: ₹480 (Kirana) • ₹2,800 (Apparel & Vault). • VIP Conversion: 10%–12% of transacting user base converts to paid subscription.	INDUSTRY BENCHMARK COMPARISON • Cred: High rewards engagement, but high burn; SIW has merchant-funded point sinks. • CashKaro: High margins, but purely online affiliate; SIW unlocks offline physical commerce. • Zepto/Blinkit: 25% take rate burnt on dark stores; SIW captures positive unit margin from day 1.
---	---	--

Investment Slide: Raising Seed Round for Cluster Expansion

Securing an 18-month operational runway to establish defensible merchant density and positive contribution margins.

THE ASK & DEAL TERMS

TARGET CAPITAL RAISE

₹4.00 Cr (\$500k USD)

- **Round Structure:** Compulsorily Convertible Preference Shares (CCPS) or Seed SAFE.
- **Target Pre-Money Valuation:** ₹20.00 Cr (\$2.4M).
- **Post-Money Valuation:** ₹24.00 Cr • Dilution: 16.7%.
- **Runway:** 18 to 20 Months across dual pilot and expansion hubs.
- **Parent Backing:** Fully incubated by Renext Technologies Pvt Ltd.

USE OF PROCEEDS ALLOCATION

Product & AI Engineering	35% (₹1.40 Cr)
Multimodal OCR model optimization, anti-fraud perceptual hashing, lightweight POS rails.	
Merchant Density & Ground Operations	25% (₹1.00 Cr)
Field merchant onboarding in Rudrapur & Bengaluru commercial market corridors.	
User Acquisition & Viral Loops	20% (₹0.80 Cr)
Point-of-sale standee placement, cashier incentives, and user referral credit pool.	
Working Capital & Regulatory Buffer	20% (₹0.80 Cr)
DPDP compliance audits, institutional GST legal architecture, operational liquidity.	

CAPITALIZATION TABLE (POST-SEED): Founders & Renext Technologies: **73.3%** • Seed Investor Syndicate: **16.7%** • ESOP Pool: **10.0%**

18-MO SERIES A MILESTONE: ₹25 CR GMV

Appendix A: Executive Team Profiles & Quarterly OKRs

Granular leadership profiles, accomplishments, and quantifiable objectives for the upcoming operational cycle.

Founder & Chief Executive Officer

Renext Technologies Pvt Ltd • contact@spenditwisely.com

Key Expertise: Fintech distribution models, behavioral loyalty frameworks, venture scaling, and Indian tax compliance systems.

Accomplishments: Conceptualized SpendItWisely's closed-loop GST reward mechanism, structured dual-city pilot partnerships, and negotiated master weaver federation agreements.

NEXT PERIOD OKRS (Q3–Q4 2026):

- Close ₹4.0 Cr Seed financing round with strategic angel syndicate.
- Achieve 100+ active GST-registered Kiranas onboarded across Rudrapur.
- Maintain >65% 30-day user retention on receipt scanning in pilot corridors.

Co-Founder & Chief Technology Officer

Renext Technologies Pvt Ltd • tech@spenditwisely.com

Key Expertise: Multimodal computer vision, document intelligence, perceptual image hashing, high-throughput cloud microservices.

Accomplishments: Developed proprietary sub-3-second bill parser handling thermal paper distortions, crinkled slips, and complex tax splits with 98.5% accuracy.

NEXT PERIOD OKRS (Q3–Q4 2026):

- Deploy on-device edge OCR to lower cloud API costs by 70%.
- Achieve sub-2.0 second end-to-end receipt parsing latency.
- Deploy multi-tenant lightweight merchant POS scanner web-app.

Appendix B1: Business Model Canvas & Strategic SWOT Analysis

Comprehensive institutional mapping across value creation, revenue streams, and competitive positioning.

THE 9-PILLAR BUSINESS MODEL CANVAS

Key Partners: Kirana federations, ONDC logistics, FMCG brands, Master weaver co-ops.	Key Activities: AI invoice OCR, anti-fraud auditing, merchant density onboarding, demand routing.	Value Propositions: Consumers: Free savings on bills. Kiranas: Incremental footfall @ 2% fee. Brands: Offline SKU intel.	Customer Relations: Automated savings wallet, neighborhood WhatsApp circles, VIP concierge.	Customer Segments: Middle-class households, grocery shoppers, GST Kiranas, ethnic fashion buyers.
Cost Structure: Cloud OCR inference, ground merchant ops reps, point-of-sale marketing standees, DPDP compliance.			Revenue Streams: 1.5%–2.5% merchant GMV micro-take, ₹199/mo SpendIt VIP subs, 25%–40% Vault margins, FMCG B2B data.	

STRENGTHS

- Asset-light: zero warehouse capex.
- First-mover in GST consumer loyalty.
- Sub-3-second proprietary OCR.
- High 21.7× LTV/CAC ratio.

WEAKNESSES

- Reliance on consumer habit shift.
- Thermal bill fading / poor paper bills.
- Requires high corridor store density.
- Initial brand education required.

OPPORTUNITIES

- Expansion into utility bill offsets.
- ONDC national protocol integration.
- Tier-2 & Tier-3 retail expansion.
- Monetizing FMCG trade data feeds.

THREATS

- UPI giants cloning bill scanner.
- Aggressive quick-commerce subsidies.
- GST portal API rate limit changes.
- Counterfeit invoice attempts.

Appendix B2: Power + Effects & Network Effect Value Models

Analyzing structural defensibility across 6 competitive powers and mathematical network models.

1. PLATFORM & NETWORK EFFECTS

Mechanism: Value $\propto n^2$ (Metcalf's Law)

Each newly scanned receipt enriches our SKU dataset, making merchant deals more personalized and drawing more merchants to join the network.

2. FLYWHEEL & LEARNING EFFECTS

Mechanism: Compounding ML Accuracy

With every 100k bills parsed, our multimodal model trains on rare local brands and distorted fonts, dropping parsing error rates below 1.2%.

3. SCALE & PRODUCTION POWER

Mechanism: Decreasing Marginal Unit Cost

Cloud OCR costs decrease 80% through model quantization and on-device inference, while merchant acquisition cost is amortized over lifetime GMV.

4. PROMOTION & VIRAL SPREAD

Mechanism: Group-Forming Model (2^n)

Household shopping clusters and neighborhood WhatsApp groups share flash deals, creating exponential local word-of-mouth adoption.

5. PROTECTION & SWITCHING MOATS

Mechanism: Accumulated Stored Wallet Value

Users with accumulated reward credits and complete tax receipt histories face high friction switching to un-incentivized platforms.

6. MATHEMATICAL VALUE MODELS

Broadcasting (n): Daily app discount push.

Two-Sided P2P (n^2): Shoppers interacting with Kiranas.

Group Forming (2^n): Apartment & neighborhood bulk-buying savings circles.

Appendix C: A16Z Framework Metrics, AARRR & Startup Valuation

Deep institutional rigor applying Andreessen Horowitz (A16Z) benchmarks and multi-model startup valuation.

1. A16Z SAAS & FINTECH METRICS

- **GMV vs Net Revenue:** Distinct clarity between ₹14.5 Cr Year 1 GMV and ₹1.10 Cr net platform revenue.
- **Blended vs Paid CAC:** ₹85 Blended CAC (₹30 in-store QR, ₹25 referral, ₹180 paid digital).
- **Gross Margins:** 72%–80% gross margin on net platform revenue streams.
- **Burn Multiple:** Seed burn multiple target of <1.2× net burn / net new ARR.
- **Concentration Risk:** Top 10 Kiranas contribute <8% total platform GMV.

2. PIRATE METRICS (AARRR ENGINE)

- **Acquisition:** In-store cashier prompt & counter QR scan → app download.
- **Activation:** First successful GST bill upload & receipt credit verified in <60s.
- **Retention:** 65%+ 30-day repeat receipt scanning rate in active corridors.
- **Referral:** 35% of active users invite at least 1 friend via "Give ₹25, Get ₹25".
- **Revenue:** 2.0% merchant GMV micro-take + ₹199/mo VIP subscription conversion.

3. STARTUP VALUATION FRAMEWORKS

- First Chicago Method:** Weighted average of Bull (₹45 Cr), Base (₹24 Cr), and Bear (₹12 Cr) scenarios = **₹23.5 Cr** valuation.
- VC Method:** Target 10× return on ₹250 Cr Series B exit = **₹20 Cr–₹25 Cr** pre-money Seed.
- Berkus Method:** Full value ascribed for proprietary tech, strategic parent backing, and dual pilot traction = **\$2.2M (₹18.5 Cr)**.
- Seed Comps:** Indian fintech-loyalty seed deals price at \$2M–\$3M pre-money.

ACTIVE ENGAGEMENT BENCHMARK:

Target WAU/MAU of **45%** driven by daily grocery shopping frequency and automated tax ledger tracking.

NPS BENCHMARK: >62

Stakeholder Feedback Loops & Pitch Deck Optimization Principles

Structured feedback loops across customers, partners, and investors to continuously hone product-market fit.

1. FEEDBACK LOOPS BY STAKEHOLDER

- **For Customers:** *"What makes you choose to scan a receipt? Which store discounts do you use most frequently?"*
- **For Kirana Merchants:** *"How many new customers did SpendIt credits bring this week? Is QR redemption fast enough at billing?"*
- **For Investors & Advisors:** *"What is our #1 vulnerability in the unit economics? What will get you to a 'Yes' today?"*

2. THE 5 PRINCIPLES OF BETTER PITCH WRITING

- **Clear:** Short, punchy prose; elimination of jargon and crypto-adjacent buzzwords.
- **Complete:** Rigorous coverage of Who, What, Where, When, Why, and How.
- **Compelling:** Rooted in real household inflation struggles and Kirana existential pressure.
- **Comparable:** Clear benchmarks against quick-commerce aggregators and fintech rails.
- **Realistic:** Every projection anchored in defensible pilot corridor unit economics.

3. STRATEGIC FOCUS FILTERS

- **Customer > Self:** Focus on consumer savings and merchant footfall, not just our algorithm.
- **Benefits > Features:** Highlight realized grocery savings rather than OCR neural architecture.
- **Offers > Single Product:** A network linking grocery, utility offsets, and boutique lifestyle.
- **Coopetition > Warfare:** We empower Kiranas against dark stores rather than trying to destroy them.

"Scan. Track. Save. — Reimagine. Rebuild. Renext."

SpendItWisely • Renext Technologies Pvt Ltd • Seed Investment Round • Bangalore & Rudrapur Pilots
